

Task on S3, CloudFront & Route 53

1. Configure VPC peering in cross regions.

Created VPCs in different regions (e.g., Ohio & N. Virginia).

- Established a VPC peering connection between the two regions.
- Accepted the peering request in the acceptor region.

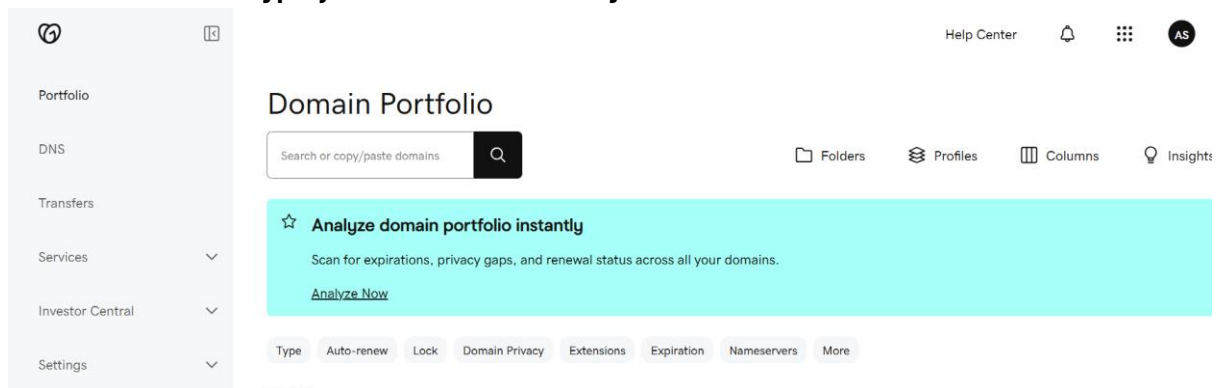

- Updated route tables in both VPCs to enable communication using peering connection ID.
- Verified connectivity using private IP communication between EC2 instances.

```
[root@ip-10-0-1-36 ~]# ping 3.14.252.6
PING 3.14.252.6 (3.14.252.6) 56(84) bytes of data.
64 bytes from 3.14.252.6: icmp_seq=1 ttl=121 time=11.2 ms

[root@ip-10-0-1-36 ~]#
```

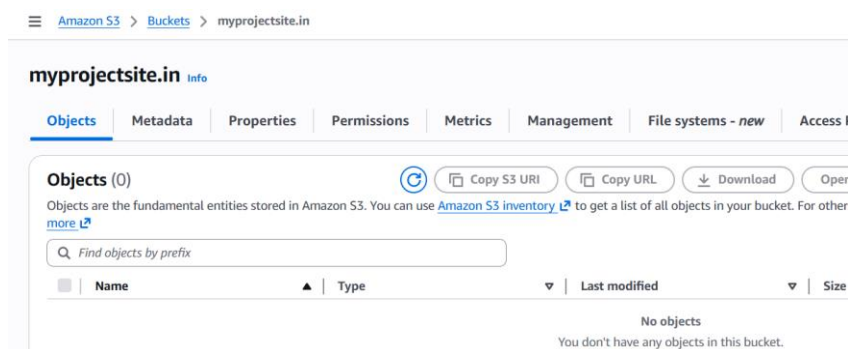

2. Purchase one domain from GoDaddy.

- Purchase myprojects.co.in in Go daddy website

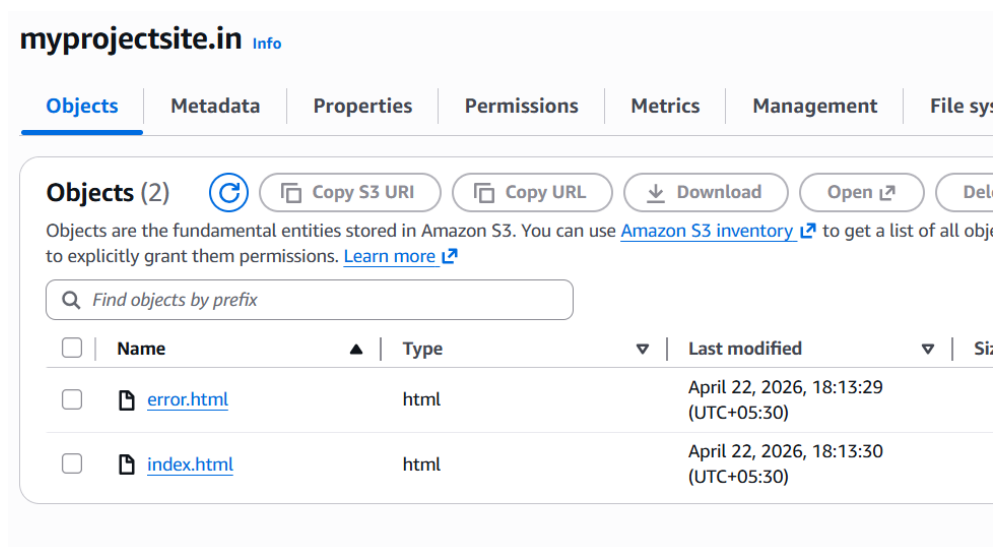

3. Deploy static website in S3.

- Create a new bucket using my domain name

- In that bucket added 2 files index.html and error.html

- In static website hosting enable it and copy the link

Static website hosting

Use this bucket to host a website or redirect requests. [Learn more](#)

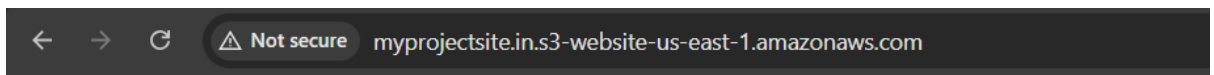

We recommend using AWS Amplify Hosting for static website hosting
Deploy a fast, secure, and reliable website quickly with AWS Amplify Hosting. Learn more about [Amplify Hosting](#)

S3 static website hosting
Enabled

Hosting type
Bucket hosting

Bucket website endpoint
When you configure your bucket as a static website, the website is available at the AWS Region-specific website endpoint of the bucket.
<http://myprojectsite.in.s3-website-us-east-1.amazonaws.com>

- Successfully the file with Block permissions are OFF.

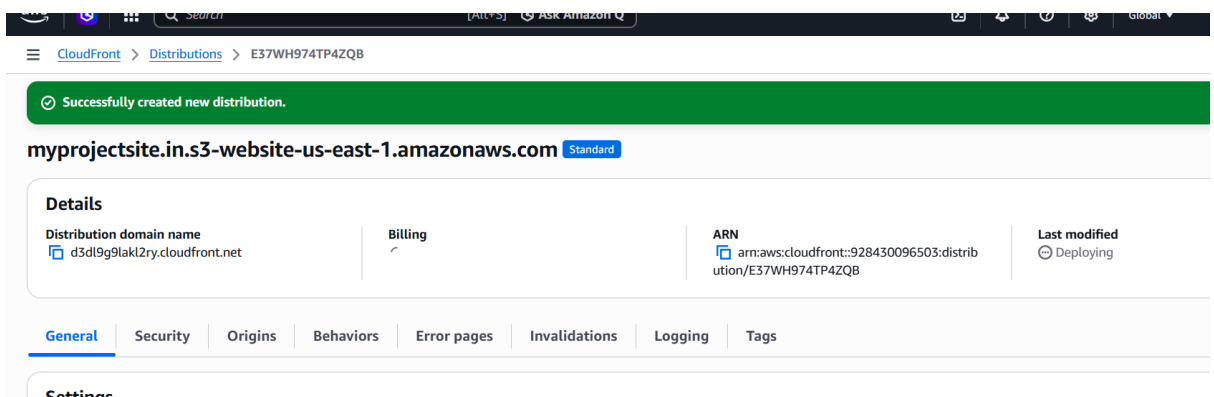

Hello Arun

This is my first website

4. Create a CDN and attach one SSL certificate.

- Created a distribution using Amazon CloudFront

- Requested SSL certificate using

[AWS Certificate Manager](#) > [Certificates](#) > 60bbc905-0afc-4cd6-beb0-e5c94dbad66a

AWS Certificate Manager (ACM)

- List certificates
- Request certificate
- Import certificate
- AWS Private CA [↗](#)

Successfully requested certificate with ID 60bbc905-0afc-4cd6-beb0-e5c94dbad66a
A certificate request with a status of pending validation has been created. Further action required.

60bbc905-0afc-4cd6-beb0-e5c94dbad66a

Certificate status

Identifier
60bbc905-0afc-4cd6-beb0-e5c94dbad66a

ARN
[arn:aws:acm:us-east-1:928430096503:certificate/60bbc905-0afc-4cd6-beb0-e5c94dbad66a](#)

Tags

- **Attached the issued SSL certificate to CloudFront and enabled HTTPS (secure access).**

Successfully created DNS records
Successfully created DNS records in Amazon Route 53 for certificate with ID 60bbc905-0afc-4cd6-beb0-e5c94dbad66a.

Update on ACM public certificate validity
We have updated the validity period for ACM public certificates to comply with new CA/Browser Forum guidelines. We have also reduced exportable certificate pricing. [Learn more](#)

5. Create a Route 53 hosted zone and map the domain with the CDN.

- **Created a hosted zone in Amazon Route 53 for domain (myprojectsite.in).**

[aws](#) [Route 53](#) > [Hosted zones](#) > myprojectsite.in

Route 53

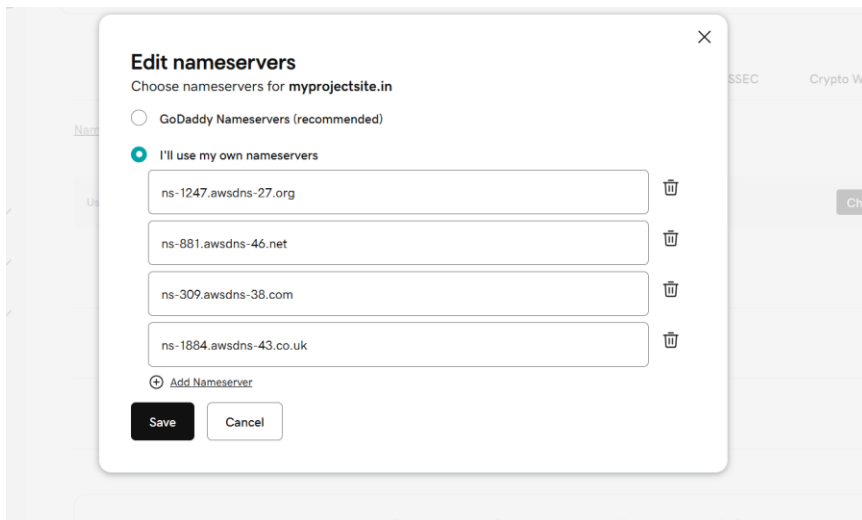

- Dashboard
- Hosted zones**
- Health checks
- Profiles
- Global Resolver

myprojectsite.in was successfully created.
Now you can create records in the hosted zone to specify how you want Route 53 to route traffic for your domain.

Public myprojectsite.in [Info](#) [Delete zone](#) [Test record](#) [Configure query logging](#)

Hosted zone details [Edit hosted zone](#)

- **Updated nameservers in GoDaddy to Route 53 nameservers.**

- Added an A record (Alias) pointing to CloudFront distribution.

Create record [Info](#)

Quick create record

▼ Record 1

Record name [Info](#)
 myprojectsite.in
Keep blank to create a record for the root domain.

Record type [Info](#)
 A – Routes traffic to an IPv4 address and some AWS resources

☒ Alias

Route traffic to [Info](#)
 Alias to CloudFront distribution
 US East (N. Virginia)
An alias to a CloudFront distribution and another record in the same hosted zone are global and available only in US East (N. Virginia).

Routing policy [Info](#)
 Simple routing

Evaluate target health
☐ No

- Verified DNS propagation and confirmed domain is accessible globally.

[Route 53](#) > [Hosted zones](#) > myprojectsite.in

Record for myprojectsite.in was successfully created.
 Route 53 propagates your changes to all of the Route 53 authoritative DNS servers within 60 seconds. Use "View status" button to check propagation status.
